9. Document Version Information

1. Introduction

These training standards provide guidance on the expected training for our directly employed and contract workforce.

Everyone must ensure their training is up to date.

If re-training is needed before the expiry date, it should be booked in a timely manner.

2. Training Matrix

Training Matrix:

- Construction Secretaries and Customer Care Managers must maintain a Training Matrix for all directly employed staff and agency workers. This should include training and expiry dates.

Monthly Checks:

- They must check the Training Matrix monthly to ensure no essential training competencies are about to expire.

Meetings:

- Discuss the Training Matrix and training requirements at bi-monthly HS&E Construction Department Working Group meetings and quarterly HS&E Committee meetings.
- Record any actions in the meeting minutes.

Refer to HSMS forms:

[075](#) – Template Construction Training Matrix

[076](#) – Template Customer Care Training Matrix

The Local Group HS&E Advisor will also undertake a bi-annual check of training matrices as part of their office inspections.

3. HS&E Training & Competencies

All staff must have the appropriate HS&E training and skills needed for their role.

3.1 Construction Management

3.9 Manufacturing Operatives

These courses, qualifications and evidence of competency are mandatory for manufacturing operatives, including Agency Workers

Title	Commencement	Who must attend	Remarks
Site HS&E induction	Day 1 of starting on each site	All Manufacturing Operatives	Undertaken by Production Manager or Line Manager

4. Site Visitors

Any visitor who wants to walk around the construction area alone must sign in and get a full Health, Safety, and Environment (HS&E) induction from site management. They must also have a valid CSCS or HBF Home Builders Visitors card, or an equivalent

The induction must be undertaken by The Persimmon Way APP. Stage one (generic induction completed by the APP) and stage two (site specific induction completed by site management)

Refer to HSMS [guidance](#) – site induction part 2

Refer to HSMS [guidance](#) – The Persimmon Way APP for site induction and sign in -who needs it?

All visitors must sign in and out of the site. If they haven't had the full HS&E induction, they can't walk around the site alone. They must be accompanied by a member of site management.

For non-construction tasks, site management can escort workers to their work area and don't need to stay with them the whole time. It's important that site management also escort them back after they finish their task and remind them to stay at their work location unless there's an emergency.

A list of non-construction occupations has been set out by the Construction Skills Certification Scheme:

[Non-construction occupations | Official CSCS Website](#)

Before entering the construction area, site management must brief the visitor on:

- What to do in the event of an emergency, including where the fire muster point is located
- The traffic management arrangements of the site
- Where to find the welfare facilities.

5. Executives and Directors

It is recommended that members of the Executive Committee/ Board level complete the IOSH Leading Safely course, or equivalent.

It is recommended that all Operating Business Directors and Heads of Department complete the IOSH Safety for Executives and Directors course, or equivalent.

The Group H&SE Department will run internal equivalent courses every 3 years and recordings of the training will be available in the interim period on the LMS.

6. Monitoring

All Line Managers must periodically review their team's health, safety and environmental training requirements.

The local Group HS&E Advisor will check training certificates and competencies at regular intervals.
