

Emergency Spill Response Service

ENVIRONMENTAL RISK REDUCTION

In the event of a fuel / oil spill which cannot be contained on site, contact Adler & Allan for an immediate site response. Quote our contract ref no: **PER037.**

An instruction must also be sent via email to: groupoperations@adlerandallan.co.uk

1 - STOP

- Switch off any sources of ignition
- Try to identify the source of the pollution
- If safe to do so, stop the flow of liquid by closing taps, righting containers, turning off pumps etc.

2 - CONTAIN

- Put on the correct PPE
- Without putting yourself at risk, attempt to stop the spill or run-off from spreading by using the contents of the appropriate spill kit e.g. absorbent materials and booms or earth or sand
- Cover/plug drains and gullies
- Divert liquid flows away from drains and watercourses

Keeping our team safe

0800 592 827

Response Service:

- ✓ Nationwide
- ✓ 24/7
- ✓ 365 days
- ✓ 1 hour mobilisation
- ✓ Full clean up
- ✓ Disposal service

3 - NOTIFY

- Notify the site manager immediately, providing the following information:
 - Location of spill/run-off
 - Substance/liquid involved
 - Quantity released
 - Whether it has entered a drain/watercourse
- If the spill/run-off cannot be controlled, and/or has entered a drain or watercourse, we will contact our spill response team, **Adler & Allan** on **0800 592 827** who will provide immediate specialist advice and assistance if required.
- Persimmon is committed to reducing environmental incidents. If you have any ideas on preventing pollution, please speak to your Group Health, Safety & Environment Advisor.
